

Ethics aspects to work disability prevention practices

Christian Ståhl

National Centre for Work and Rehabilitation

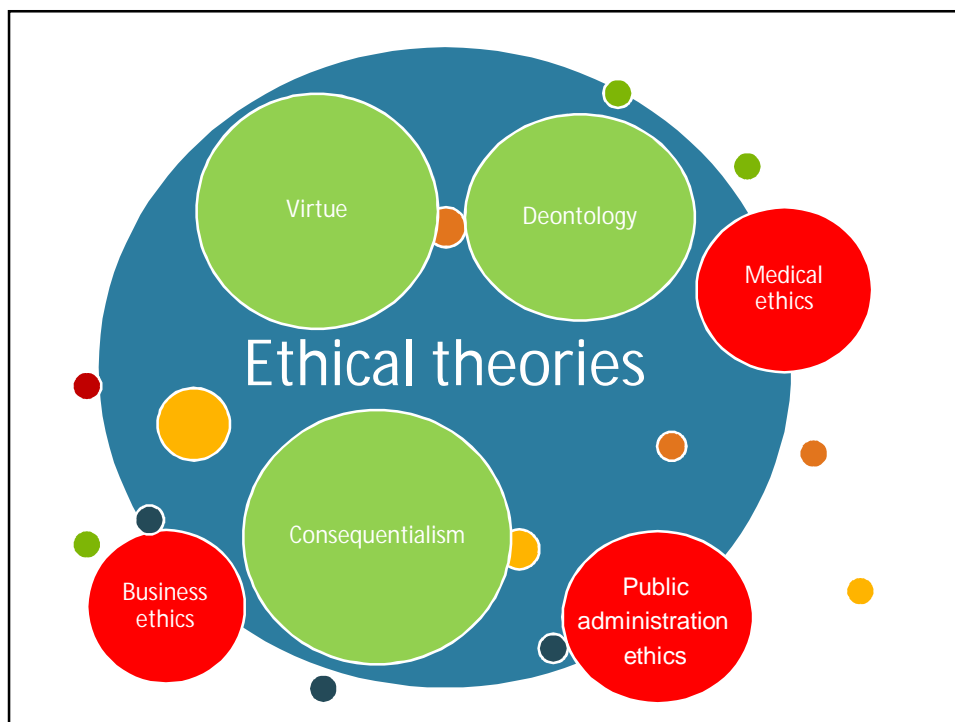

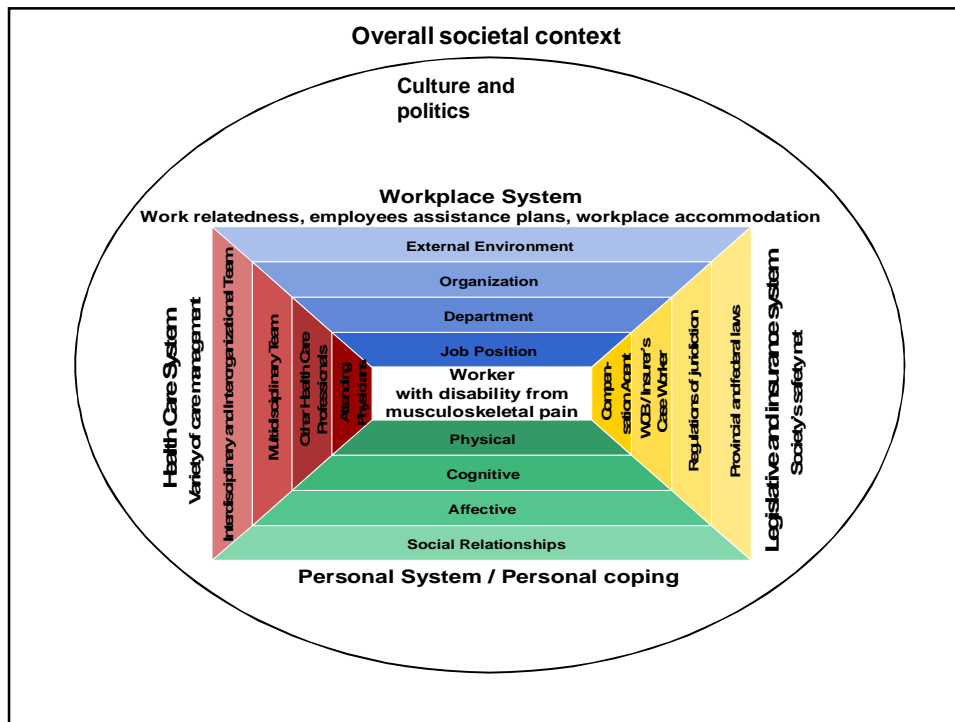

2

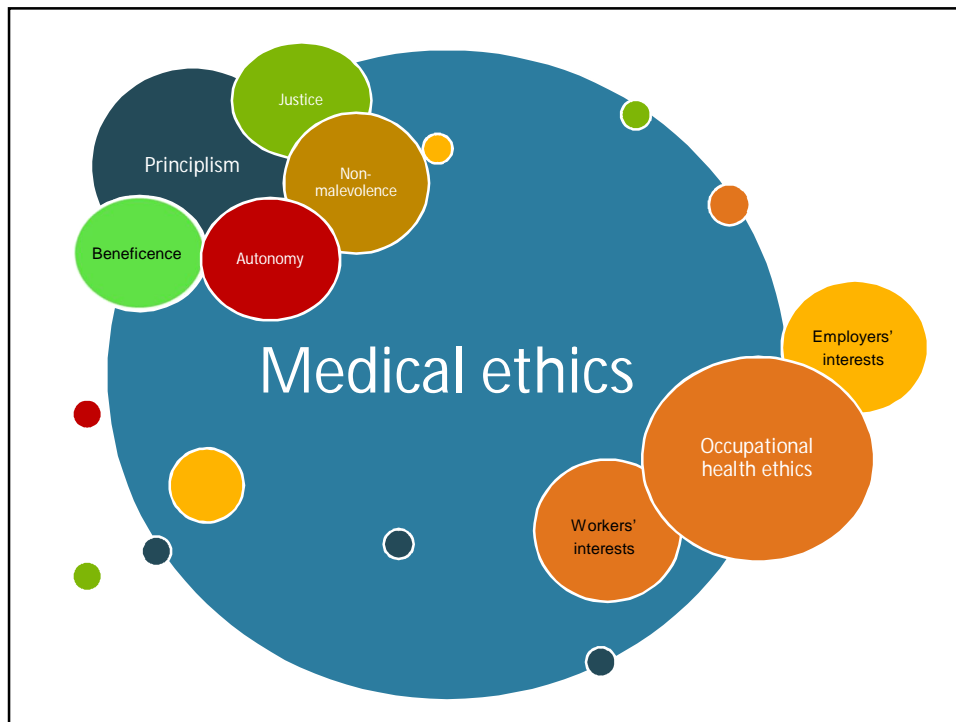

Outline of this session

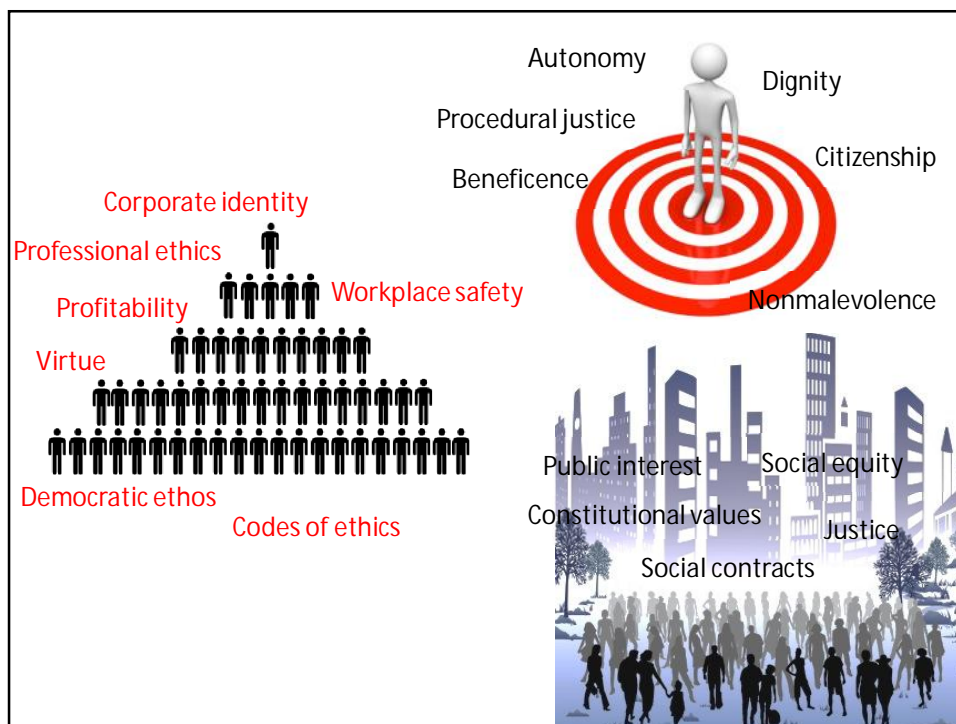

Learning objectives:

- Explore different ethical perspectives and apply these to WDP practice

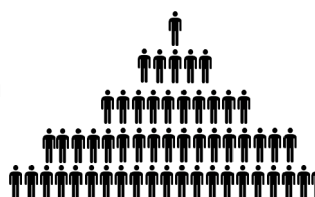

Micro-level ethics, examples

- Interactions and encounters between professionals and patients/clients/citizens
- Examples of studies:
 - Frank, on patient meetings
 - Müssener, on encounters with professionals

Meso-level ethics, examples

- Professional codes of conduct, interactions within and between organizations
- Examples of studies:
 - Stensöta, on professional values and roles
 - Ybema, on health effects of justice
 - Seing, on employer strategies

Macro-level ethics, examples

- The broader context of professional practices and the consequences of actions on a larger scale
- Examples of studies:
 - Lippel, on health effects of compensation systems
 - Burström, on the equality in compensation and rehabilitation systems
