

Exposure Assessment, Diagnosis and Follow-up of Hand-arm Vibration Syndrome

Online Zoom Course

26-27.9.2023

Tuesday, 26.9.2023

9.30-9.40	NIVA welcome and general information	Cecilia Weckman
9.40-10.10	Introduction and presentation round	Thomas Clemm
10.15-10.45	The shaking story of HAVS, from 1911 to 2023	Thomas Clemm
10.45-11.00	Q&A / Discussion	
11.00-11.15	<i>Break</i>	
11.15-11.45	Exposure assessment: How do we deal with uncertainty related to evaluations of workplace exposures	Paul Pitts
11.45-12.00	Q&A / Discussion	
12.00-13.00	<i>Lunch break</i>	
13.00-13.30	Risk assessment: Can we predict risk of HAVS? What factors do we have to consider?	Karl-Christian Nordby
13.30-14.00	Q&A / Discussion	

Wednesday, 27.9.2023

9.30-10.00	The effect of high frequency vibrations and shock	Hans Lindell
10.00-10.15	Q&A / Discussion	
10.15-10.45	Differential diagnoses	Lars Dahlin
10.45-11.00	Q&A / Discussion	
11.00-11.15	<i>Break</i>	
11.15-11.45	The role of quantitative clinical tests in diagnosis of HAVS	Catarina Nordander
11.45-12.00	Q&A / Discussion	
12.00-12.30	Diagnostics of HAVS at occupational health departments in Norway	Karl Færden

12.30-12.45 Q&A / Discussion

12.45-13.30 *Lunch*

13.30-14.00 Follow-up of HAVS: What do we know about long-term prognosis? Treatment and guidelines on continued vibration exposure and work.

Lisa Aarhus

14.00-14.15 Q&A / Discussion

14.15-14.45 Conclusions
Closing of the course

**Karl-Christian Nordby
Thomas Clemm,
Cecilia Weckman**
